JASMINE MAE CUENCO

BS INFORMATION TECHNOLOGY STUDENT

it.cuencojasminemae@gmail.com | 0969-091-7160
399 Salapungan St., San Nicolas, City of San Fernando, Pampanga, Philippines

CAREER OBJECTIVE

To obtain a position where I can apply my skills in full-stack web and mobile development, while continuing to grow my technical abilities and contributing to the goals of the organization.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, HTML, CSS, SQL, Dart
- **Web Development:** Nuxt 4, Nuxt UI, Vue.js, MapLibre GL JS
- **Backend & Databases:** Strapi 5, Node.js, REST APIs, PostgreSQL, Neon
- **Mobile Development:** Flutter
- **AI Tools:** Claude, ChatGPT, locally run AI models
- **Developer Tools:** VS Code, Git, GitHub
- **System Design:** Role-based access control (RBAC), interactive map interfaces, journey planning
- **Networking:** Cisco Packet Tracer, CCNA coursework (routing, switching, wireless, network security), IoT fundamentals
- **Video Editing:** CapCut, Alight Motion
- **Microsoft Office:** Word, Excel, PowerPoint

TECHNICAL PROJECTS

PAMANA – Intelligent Rural Transportation Access System

Full-Stack / Backend Developer | Can You HackIT? Clark 2026 (IBPAP Regional Student Hackathon)

- Built a journey-planning platform to improve public transport access in the Mexico–San Fernando area of Pampanga.
- Developed a Strapi 5 backend with PostgreSQL and REST APIs for routes, stops, vehicles and trips.
- Implemented data-driven journey planning with interactive maps, place search and walking directions.
- Integrated the OpenAI API to explain routes and transport information to passengers in plain language.
- Technologies: Strapi 5, PostgreSQL, Node.js, Nuxt, Vue.js, MapLibre GL JS, Geoapify, OpenAI API

WORK EXPERIENCE
